Appln. No. 10/511,755 Amd. dated January 9, 2007

Amendments to the Specification

Please amend the last paragraph on page 1 to read as follows:

It has been shown that tea tree oil inhibits certain fungi (see for example Australian Journal of Experimental Agriculture 39:1, 86-81, 1999). The treatment was satisfactory as it killed the fungi to a large extent, and mainly fungi that attack human, while plants it caused phytotoxicity to attack plants.
